

POWERPLANT

**ULTIMATE PERFORMANCE WINCH.
ULTIMATE PERFORMANCE COMPRESSOR.
ALL IN ONE COMPACT UNIT.**

Engineered to help you do twice the work, the WARN PowerPlant™ Dual Force is the world's first on-board air compressor and winch housed in the same space-saving unit.

Whether you're winching and airing up while off-roading, inflating a raft or air mattress, or running a nail gun or impact wrench, the PowerPlant is the new way to get things done.

THE POWERPLANT DUAL FORCE HP is the best choice for off-road enthusiasts. Its fast line speed and 9,500 lb. pull rating are well suited to recreational off-road use.

PowerPlant Dual Force HP: PN 71800

Max. Rated Pull: 9,500 lbs (4310 kg)
Line Speed: 26.2 feet (8 m) per minute (no load) 5 feet (1.5 m) per minute (at max load)
Max. Air Pressure: 100 PSI (690 kPa)
Air Flow Rating: 12 CFM at 0 PSI; 5 CFM at 90 PSI (340 l/min at 0 kPa; 142 l/min at 620 kPa)
Rope: 125' (38m) of 5/16" (8mm) – diameter wire

THE POWERPLANT DUAL FORCE HD is perfect for contractors, tradesmen, farmers, and ranchers. With its longer duty cycle and brawny 12,000 lb. pulling capacity, you'll be able to recover your pickup or SUV without worry.

PowerPlant Dual Force HD: PN 71801

Max. Rated Pull: 12,000 lbs. (5440 kg)
Line Speed: 16.2 feet (4.9 m) per minute (no load) 4.2 feet (1.3 m) per minute (at max load)
Max. Air Pressure: 100 PSI (690 kPa)
Air Flow Rating: 12 CFM at 0 PSI; 5 CFM at 90 PSI (340 l/min at 0 kPa; 142 l/min at 620 kPa)
Rope: 80' (24m) of 3/8" (9.5mm) – diameter wire

WARN INDUSTRIES, INC.

12900 S.E. Capps Road

POWERPLANT

PRODUCT GUIDE

ON-BOARD AIR FROM THE NAME YOU'VE ALWAYS TRUSTED ON BOARD: WARN

The most trusted name in truck and automotive accessories, WARN®, is now running air support for you. We're now featuring a full line of powerful, reliable on-board 12V air compressors. Whether you're using it to power your air suspension setup on your sport truck, or just running your air tools, it's time to call in WARN Air-Power.

WARN AIR-POWER AND POWERPLANT DUAL FORCE LINEUP

The multi-award winning PowerPlant™ Dual Force (SEMA Best New Off-Road/4-Wheel Drive Product and Popular Mechanics' Editor's Choice Award, among many others) demonstrates the credibility of WARN air products, as well as the ability to integrate a premium air compressor and a WARN winch. Result: the ultimate vehicle-mounted tool.

And now the WARN Air-Power 12V on-board air compressor lineup represents the latest air-tool innovations from Warn Industries. The full array of Air-Power air compressors lets users choose the capacity and CFM delivery they need for the job at hand.

A VARIETY OF AIR PRODUCTS FOR A VARIETY OF USES

Whether it's low riders, high riders or in-between riders, every vehicle enthusiast group can use WARN Air Products. It's great for on-the-job applications, too.

PERFORMANCE AUTOMOTIVE AND AIR SUSPENSIONS The Air-Power compressors combine great looks and plenty of air for vehicles with air suspension. They're also great for inflating tires at the track or running an impact wrench in the pits.

OFF-ROAD Our top compressors air up four tires faster than many compressors can inflate one.

CONSTRUCTION Running nail guns and other tools makes job-site touch ups fast and easy with instant air from WARN.

FIRE AND RESCUE Whether it's instant air for air-bag jacks, or air chisels to chew open a wreck, WARN gets a variety of roadside rescue tasks done right.

ROADSIDE ASSISTANCE Perfect for wreckers and tow vehicles, the WARN line of air products will provide the power and durability you need.

RECREATIONAL Airing up rafts or inflating air mattresses – if it needs air, it needs a WARN air product.

AIR-POWER VTC

THE ULTIMATE 12 VOLT ON-BOARD AIR COMPRESSOR

With an abundance of power from its high-horsepower fan-cooled motor, V-twin configuration, and large one-gallon integrated intercooler and reservoir, the Air-Power VTC is the highest-performance compressor in the WARN Air-Power lineup. The VTC is ideal for powering air tools, rapidly airing up everything from tires to rafts, powering air suspension systems, and just about anything else that needs air. It comes with a removable carrying cage so you can easily transport it or hard mount it to a vehicle or trailer. A pressure cut-off switch turns the compressor off when it reaches 100 PSI and back on at low pressure, and a quick-connect hose outlet makes air hose connection fast and convenient. With all this power and all of these features, the VTC is a force to be reckoned with. **PN 75789**

Air-Power VTC Specifications:

Power:	12V DC motor
Max. Pressure Rating:	100 PSI (690 kPa)
Airflow Rating:	20 CFM @ 0 PSI, 8 CFM @ 90 PSI (566 l/min @ 0 kPa, 226 l/min @ 620 kPa)
Intercooler/ Air Reservoir Size:	One gallon (3,78 liter)

AIR-POWER SPI

BIG POWER, COMPACT SIZE

The versatile WARN Air-Power SPI has the features you want and the performance you need, and is compact enough to be mounted almost anywhere. Its powerful fan-cooled motor and robust single-piston design make it well suited for powering an air suspension system for on-road or off-road vehicles. Its integrated 1/3 gallon reservoir and intercooler means cooler outlet air temperatures and longer hose life. The SPI is also powerful enough to run non-continuous duty air tools, such as air nailers for the jobsite. A pressure switch automatically shuts the unit down when it reaches its maximum pressure rating and turns it back on when pressure drops below an efficient level. No matter how you use it, the WARN SPI is going to be up to the task.

PN 76800

Air-Power SPI Specifications:

Power:	12V DC motor
Max. Pressure Rating:	100 psi (690 kPa)
Airflow Rating:	12 CFM @ 0 PSI, 4 CFM @ 90 PSI (283 l/min @ 0 kPa; 113 l/min @ 620 kPa)
Intercooler/ Air Reservoir Size:	1/3 gallon (1,3 liter)

AIR-POWER SPC

PERFECTLY PORTABLE

The WARN Air-Power SPC is big on power and value, but small on size. The SPC has a powerful, efficient motor with a thermal protection device to prevent overheating and prolong product life. A quick-connect coupler allows the 25' air hose to be attached and removed easily. This compact unit can be hard mounted, or can remain portable, thanks to a carry handle. So no matter how you configure it, the efficient WARN Air-Power SPC is ready to go to work airing up tires, pumping up camping equipment, powering air suspension systems, or inflating anything else that requires air. **PN 77495**

Air-Power SPC Specifications

Power:	12V DC motor
Max. Pressure Rating:	150 PSI (1,034 kPa)
Airflow Rating:	1.5 CFM @ 0 PSI 1.0 CFM @ 90 PSI (42,5 l/min @ 0 kPa 28 l/min @ 620 kPa)

Includes dual air chuck and 25' air hose

AIR ACCESSORIES

The most useful on-board air products are about to get even more useful. Get the most out of your PowerPlant Dual Force and Air-Power compressor when you use these optional WARN accessories.

AIR ACCESSORY KIT

This upgrade kit includes a heavy-duty tire inflator, a set of four tire deflators, 25' of coiled nylon air hose, quick disconnect couplings, and a WARN storage bag.

PN 73945

AUXILIARY AIR TANKS

These air tanks provide an instant high-volume air charge for air locker setups, operating air tools, reseating tire beads, and simple tire inflation. Required to operate some types of pneumatic tools.

PN 73938 2.5 gallon (9.5 liter) capacity

PN 73939 5 gallon (19 liter) capacity

AUXILIARY AIR TANK PLUMBING KIT

This complete kit contains every piece you will need to hook up the PowerPlant or an Air-Power compressor to a WARN Auxiliary Air Tank.
